ODS/ETL developer

GlobServ/Orange Egypt - Since 2012 - Full-time - Cairo - Egypt

Upon National Telecom Regulation Agency decision, the dial length in Egypt was extended from 10 to 11 digits. I'm have participated in the adaptation of all third party applications interfacing with BSCS in Mobinil to support the new dial code for many external systems (Siebel, e-Bill, Fraud Management, Sales Distribution System, Dunning system, etc.).

Roles and Responsibilities:

- Studying the change impact these systems and delivering related specifications.
- Making development on the impacted interfaces.
- Leading the testing (System Integration and user acceptance).
- Tuning the Oracle performance due to the change.

Environment:

BSCS iX, Oracle 10g, SharePlex 7, Siebel 8, Nikira FMS

ODS/ETL developer

GlobServ/Orange Egypt - Since 2012 - Full-time - Cairo - Egypt

► Project Description:

The Egyptian Company for Mobile Services (Mobinil) wishes to pursue with the implementation of an Operational Data Store (ODS) to have a solution that is based on best-of-breed technologies and that can offer the functionality and performance required by today's dynamic telecommunications market. ODS is a database designed to integrate data from multiple sources for additional operations on the data. The data is then passed back to operational systems for further operations. Operational Data Store is a high importance project, allowing Mobinil to launch many marketing projects such SFA (Sales Force Automation), Campaign Management, etc.

► Roles and Responsibilities:

- □ Developed jobs using TIS (Talend integration suite) based on the technical requirement
- □ Providing Support to all Jobs designed with Talend.
- □ Administrating and Tuning Databases
- □ Oracle PL/SQL advanced development.
- □ Leading System Integration and User acceptance Testing.

► Environment:

► Talend Data Integration MPX, Oracle 11g, Linux, BSCS iX
